MARQUE FRANÇAISE

About Urban Moov

The cities of tomorrow are being shaped today; cleaner, greener, we are currently experiencing a transformation of metropolises and their means of transport.

City dwellers no longer move around as before and have multiplied the means of transport: pedaling, driving a car, a scooter, using public transport, such is his new daily life. He begins his journey by car, then by bike or scooter before getting on a tram or metro.

There is a real need for new accessories to which we are now responding with the Urban Moov range.

ERGONOMIC HANDLEBAR GRIPS

- Universal fit and easy to install. Compatible with flat/straight handlebars (inner diameter up to 22.2 mm)
- Ergonomic design. They relieve pressure on the carpal tunnel and ulnar nerve to prevent numbness during long rides
- The pattern absorbs shocks in the palms and increases grip at the fingertips
- Holding the grip in place with the aluminum collar.
- Length (140mm) of the pair of grips adaptable to most systems
